
Coherence Of Tricategories

an algebraic theory of tricategories - yale university - a relevant coherence theorem for tricategories. the coherence problem for bi-categories has a straightforward answer: every bicategory is biequivalent to a strict 2-category. thus all of the "weakness" in a bicategory can be removed by replacing the bicategory in question with a biequivalent one. this is not the case for tricategories - not every tricategory is triequivalent to a strict ... **geometric realizations of tricategories - mat.uc** - our results provide coherence for all reasonable extensions to tricategories of quillens definition of the classifying space of a category as the geometric realization of the category's grothendieck nerve. **cambridge tracts in mathematics general editors b ...** - coherence in three-dimensional category theory / nick gurski, university of sheffield. pages cm. - (Cambridge tracts in mathematics ; 201) isbn 978-1-107-03489-1 (hardback) **coherence in three-dimensional category theory** - part ii, 'tricategories', occupies nearly half the book. its central theme is its central theme is coherence (again building on the seminal work of gordon, power and street). **bicat is not triequivalent to gray - pdfsmanticscholar** - bicat is not triequivalent to gray stephen lack abstract. bicat is the tricategory of bicategories, homomorphisms, pseudonatural transformations, and modifications. gray is the subcategory of 2-categories, 2-functors, pseudonatural transformations, and modifications. we show that these two tricategories are not triequivalent. 1. background. weakening the notion of 2-category by ... **7+(1) , (/6, 167,787(abstracts 1 - fields.utoronto** - of the definition of bicategory, and i will discuss the coherence theory for tricategories with the focus being on how to use this theory to make tricategories more manageable.)255 (6(\$5&+, 10 \$7+(0\$7,&\$/6 &,(1&(6 **loop spaces, and coherence for monoidal and braided ...** - (that is, a gray-monoid) by the coherence theorem for tricategories [13,14], but there are deeper questions about braided monoidal bicategories which have no analogue in the realm of braided monoidal categories. **infinite loop spaces, and coherence for symmetric monoidal ...** - coherence 3 a corollary to coherence for tricategories. in [10], the authors prove that every monoidal bicategory is equivalent to a gray-monoid. **teisi in ab - international press** - gordon, power and street made significant progress by proving a coherence theorem for tricategories, showing that they are triequivalent to gray-categories [13]. for **biequivalences in tricategories introduction** - biequivalences in tricategories 351 it should be noted that the gray-categorical analogue of this result appears in [12], and that the full result can then be deduced by coherence for tricategories. **making weak maps compose strictly - macquarie university** - motivation idea from homotopy theory: identify weak maps $x \rightarrow y$ with strict maps $x' \rightarrow y'$ where: x' is a cofibrant replacement for x ; y' is a fibrant replacement for y . **michael makkai, mcgill university, montreal, quebec weakly ...** - another example has objects tricategories. this last example has been used to give a proof of a strong form of the coherence theorem for tricategories. 1. created date: 6/25/2010 5:18:30 pm ... **coherence for weak units - emisthselaide** - bicategories, and tricategories, and provides some new insight to these theories. to stress this fact we have chosen to formulate everything from scratch in such classical terms, without reference to the theory of fair categories.
